

A-E CONTRACTING BULLETIN 96-03, 28 AUG 96

SUBJECT: CADD COSTS

1. The Tri-Service CADD/GIS Technology Center at WES has just published Technical Report CADD-96-1, "Estimating Costs for Architect-Engineer (A-E) Computer-Aided Design and Drafting (CADD) Services." This is a very useful report which provides guidance and recommended procedures for estimating the costs associated with the preparation of design drawings by A-E's using CADD.

2. Two copies of the report are now being distributed to each Director/Chief of Engineering. If you haven't seen a copy in a couple weeks and want one, contact its author at WES, Bobby Carpenter, by E-mail or phone (601-634-4572).
